## OnBase – Unable to Complete Referral Form Receiving alert

**Purpose:** Follow this procedure when a user reports issue with unable to complete the OnBase Admission and Transfer Form receiving Patient is already Active Alert for the Receiving Clinic or has a Scheduled Encounter for the Start Date at a different Clinic.

**Required Information to be documented in each incident:**

Contact Name Contact Number Clinic / Facility Number Patient Name Patient MRN Referring clinic Receiving clinic Anticipated Start Date at Receiving Clinic Detailed Description of the issue. Screen shot of the Error

**Troubleshooting Process:**

1. Confirm with user that the issue matches the issue reported.
2. Please document required information and troubleshooting details in the Incident.
3. Look in eCube Clinicals, for ALL VISITS (including closed) at Receiving Clinic, check that the FMS Discharge Assessment has been completed. Note: Just because a visit is closed, does not mean the Discharge Assessment has been completed. Check to ensure that discharges for each visit is completed.  
  
If Discharge Assessment has not been entered, advise user to complete the assessment and then attempt to complete the Referral form again. This information refreshes quickly.
4. Check in eCube Clinicals for an open visit for a different clinic with the same start date. The user cannot complete the form for the same start date. Patients cannot have the same start date for multiple clinics. If needed, advise user to update start date or reach out to the clinics concerned for correct admit dates.
5. If user is still unable to complete the referral form, advise user to also contact PAS (Patient Admission Services) to check whether PAS has maybe already initiated the transfer on their end. In this case, the Referral form cannot be completed in OnBase and the transfer is not visible in OnBase for the Clinics.
6. Follow the resolution process.
7. If additional assistance is needed, follow escalation process.
