General Information:

Possible symptoms/errors:

User wants to know how to Allow or Prevent Channel Deletion in Microsoft Teams.

Alternative names of the system:

N/A

IMPORTANT NOTICE:

N/A

Solution:

A Team owner can restrict or allow deletion of the channels by the Team members. This article shows a guide on how to do this in Microsoft Teams.

Details:

1. Advise the user to select the Team name.
2. Ask them to click on More options then to select Manage team.
3. Under Settings tab, user needs to select Member permissions.
4. Advise the user to Check or uncheck the box next to Allow members to delete and restore channels to allow or prevent channel deletion by Team members.

Note: The above permissions apply to the internal team members, not external guests. By default, guests (external users outside your organization) cannot add or delete channels.

To change that, the team owner needs to click Guest permissions and check or uncheck the box next to Allow guests to delete channels.
