Solution:

A VPN certificate is important for authenticating a user and enabling him to use an encrypted connection to a company's network over the internet. However, VPN certificates must be updated after some time or removed and replaced in case of any issues. There is one way in removing a VPN certificate:

Via the certificate manager, installed on your computer and

This article provides information on how to remove an old personal VPN certificate from computer.

Details:

VIA CERTIFICATE MANAGER

On Windows 7, advise user to click the Start button and to type certmgr.msc in the search field. On Windows 10, user must click the Start button and simply type certmgr.msc.

Windows 7

Windows 10

In the certificate window on the left hand side, inform user to click Personal > Certificates.

On the right side, user must find the certificate issued by Fresenius FNC-ADS CA01, right click on the item and click Delete.

NOTE: Certificate information varies as it could be KABI, FNC, FME, etc.

In the confirmation screen, user must click Yes.
