Ativa is one of the most used applications, if not the most used application, in Sweden. It is used to perform a proper document management to all required document in the clinic. Ativa is used by users in Trelleborg and Sweden as well. The application uses an Access database stored on a server.

This article provides information about how to install Ativa either via installer or without.

Note: For contacts, configuration and error messages please see:

https://fmcna.service-now.com/sp?id=kb_article&sysparm;_article=KB0039126

Installation

All software sources, including the installation files for "Ativa", can be found in the following fileshare:

LocationFile share or driveTrelleborg\\freswesql01\d\$\Trelleborg Rollout Software and Drivers\Sollentuna

There are two ways to install Ativa:

1. With installer
2. Without installer

Please have a look at the attached installation documents to see how to proceed for each installation type.

Note: The installation requires a license key which can be either found:

in the software library or needs to be requested from responsible contact person on site.

During the installation please follow the steps below:

1. Specify the types of components to be installed. The "Client Application Files" option installs the files needed to use the application from the specific computer.
2. Then uncheck the option "Database, document structure and license file" and click on "Next"
3. The next step is to specify where to place the client application files. If you are unsure or do not have any special requests for how to install the files, confirm the suggested folders and paths. To continue please click on "Next".
4. The installation is asking for a database path: ("P:\AtivaDokument\Ativa Frsenius\Doc"). Please use the default setting to continue.
5. Installation completed.

Note: After successful installation please follow the configuration as being described in this article:
