This article will help you to setup YubiKeyStep 1Open browser and login to FMC Okta (fmc.okta.com) by using FMC email address and password.

Step 2.Click on your Username (top right corner of the Okta dashboard) and click on Settings.

Step 3

On next page, click on Edit Profile and then enter your password and click Verify.

**If you are not in the FMC network, you will be promoted for an MFA to be enrolled in (Okta Verify, Phone or Yubikey).

Step 4

Check Security Methods section and click on Setup next to Yubikey Authenticator.

** Note: The Security Methods section will show “Remove” next to the enrolled factors.

s

Step 5

Now, you will be directed to Setup Yubikey page.

**As per the instruction, insert Yubikey into the USB port (“Y” letter will light up in green after inserting Yubikey).

Step 6

- Tap and hold your finger for 2 seconds on the “Y” letter.
- At this point, the blank text box where your cursor is placed should be filled with code and redirected to next page).
- Also, it will give message (on bottom right corner) that Yubikey Authenticator has been setup successfully.
