General Information:

Possible symptoms/errors:

User wants to know what is the Difference between OneDrive and SharePoint?

Alternative names of the system:

OneDriveSharePoint

IMPORTANT NOTICE:

N/A

Solution:

Overview:

The difference between OneDrive and SharePoint is "content ownership". The question users have to answer is whether the content is owned by them or their team. Furthermore, they have to ask whether the team needs access to the document after the roll out of project.

Details:

OneDrive

SharePoint

Typically has a short lifespan and owned by single userIf users share the document, it has limited scope most of the time

Documents have longer lifespan and whole team, or group own the documentsDocuments need to be shared with all of them

NOTE:

Typically, user starts working with a file on their own OneDrive and move it to the SharePoint when it's ready for collaboration. Confidential files should be edited locally or must be classified as confidential prior to uploading them to SharePoint or OneDrive.
