iOS Device set up without Apple-ID

This guide will help you set up your new device without using Apple-ID.The illustrations shown may vary slightly by device type or ios version. External Apple Link: Set up your iPhone or iPad

Video Guide:

-------Step by Step instructions

Step 1 - Turn on your devicePress and hold the device's power button until you see the Apple logo. You'll then see "Hello" in many languages. Press the home button (for iPhone 8 and older) or swipe up (for iPhone 10 and newer).When asked, choose your language. Then tap your country or region. This affects how information looks on your device, including date, time, contacts, and more.

Step 2 - Quick StartApple offers for you to transfer all your data from an old device. Please do not do this due to our security policies. Tap on "Set Up Manually".

Step 3 - Activate your deviceYou need to connect to a Wi-Fi network or a cellular network to activate and continue setting up your device. Tap the Wi-Fi network that you want to use or select a different option. If you're setting up an iPhone or iPad (Wi-Fi + Cellular), you might need to insert your SIM card first.

Step 4 - Set up Face ID or Touch ID and create a passcodeOn some devices, you can set up Face ID or Touch ID. With these features, you can use face recognition or your fingerprint to unlock your device and make purchases. Tap Continue and follow the instructions, or tap "Set Up Later In Settings."Next, set a six-digit passcode to help protect your local data. You need a passcode to use features like Face ID or Touch ID. If you would like an alphanumeric passcode, please tap on "Passcode Options".

Step 5 - Apps & Data transferIn this step, Apple offers you to transfer apps and data to your new device. Please skip this step and tap on "Don't Transfer Apps & Data" due our security policies.

Step 6 - Sign in with your Apple-IDIn this step, Apple offers you to log in with your Apple-ID. Please skip this step and tap on "Forgot password or don't have an Apple-ID" due our security policies. Please tap on "Set Up Later in Settings" and confirm it.

Step 7 - Turn off automatic updates and setup other features

On the next screens, you can decide whether to share information with app developers and allow iOS to update automatically.In this step, your iOS device would like to know if you're agreed to share your information with Apple. Please tap on "Don't share with Apple". On the next step, Apple offers you to activate automatic system updates. Please tap on "Install Updates Manually".

Step 8 - Set up SiriNext, you'll be asked to set up or enable services and features, like Siri. On some devices, you'll be asked to speak a few phrases so that Siri can get to know your voice. Please tap on "Set Up Later in Settings".

Step 9 - Set up Screen Time and more display optionsScreen Time gives you insight into how much time you spend on your devices. After you set up Screen Time, you can turn on True Tone if your device supports it, and use Display Zoom to adjust the size of icons and text on your Home screen. Please tap on "Set Up Later in Settings".

After all steps done, tap "Get started" to begin using your device.
