General Information:

Possible symptoms/errors:

User wants to know how Sharepoint is integrated with Microsoft TeamsUsers wants to know if new team created in Teams will be also automatically created as SharePoint team site.

Alternative names of the system:

Microsoft TeamsSharepoint

IMPORTANT NOTICE:

N/A

Solution:

Microsoft Teams and SharePoint are two completely different platforms with different capabilities and uses however, both are very strongly connected with each other. Microsoft Teams is one of the most powerful chat-based collaboration tools and SharePoint could be used to extend the way how your team works in Microsoft Teams. This article shows how coexistence of SharePoint and Teams works.

Advise user that every new team created in Microsoft Teams is automatically created as a SharePoint team site.

Inform user that for every channel created in Teams, a folder is automatically created within a SharePoint document library.

All documents uploaded to Teams are automatically stored in SharePoint document library.

Advise user that when they click on the Files tab within a channel in Teams, the files they see are stored in a document library on a SharePoint team site. If this article did not resolve the issue, please log a ticket and forward it to Ext_WW_Collaboration_SLS_Capgemini
